

UNLEASHED DRIVING DYNAMICS

The interstar PowerPedal is directly connected to the accelerator pedal of the car. It improves (shortens) the response time of the engine when you push down the accelerator pedal. The device recalculates the original signal and forwards the new signal directly to the motor management system.

Driving dynamics at your fingertips: the PowerPedal can be customised to the desired driving dynamic at 18 different levels – even while driving. The PowerPedal device can be installed with some few and simple steps in almost all available vehicle models with an electronic accelerator. It is ready for use immediately after installation.

Because of the overarching technology the interstar PowerPedal can be easily transferred to another car if necessary.

The interstar PowerPedal requires no registration – the vehicle's manufacturer warranty normally remains unaffected by the installation of the additional electronics.

CONTACTS AND SALES INFORMATION

The worldwide interstar distribution network guarantees maximum availability and the very best customer support.

Distributor: MotiveMods
2691 E Hacienda Ave
Las Vegas, NV 89120

satisfaction.**

AUTOMOBILE

interstar®
AUTOMOTIVE TECHNOLOGIES

QUALITY FROM AUSTRIA

The interstar automotive technologies team is engaged in the optimization of automotive, industrial, HGV, ship, and agricultural machinery engines.

We develop and produce electronic modules for improving the performance of diesel and petrol engines in Perg (Upper Austria). Currently (as of summer 2015), we are able to implement over 5000 optimisation variations within our product range, thereby covering almost all types of vehicles. Our team of experts guarantees the highest quality. We are therefore able to grant 5 years of full warranty on all our products.

The interstar sales and service network spans a global market and we are in close contact with our customers. This allows us to address individual user needs and implement customised solutions.

TECHNOLOGY

More dynamic power development, efficient engine management

With the interstar PowerPedal, the full dynamic potential of the vehicle is utilised by the optimised accelerator pedal feature. Depending on the selected driving mode the optimised control signals also allow significant fuel savings.

Ergonomic and intuitive

The ergonomic housing design of the controller allows for intuitive operation. The selected optimisation mode is clearly displayed through coloured LED.

Level 1: CRUISE

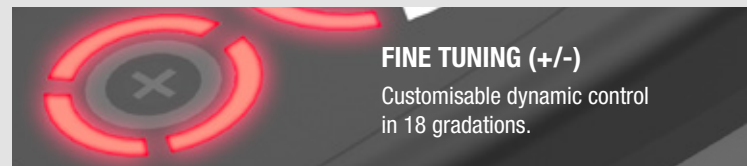

Economical driving,
ideal for city driving

Level 2: DYNAMIC

More dynamic driving,
more everyday driving
pleasure

Level 3: RACE

Aggressive response
for sports-type driving

FINE TUNING (+/-)

Customisable dynamic control
in 18 gradations.
